

Diabetes In CLARENDON County, 2005

Produced by the South Carolina Department of Health and Environmental Control

Impact of Diabetes in the United States

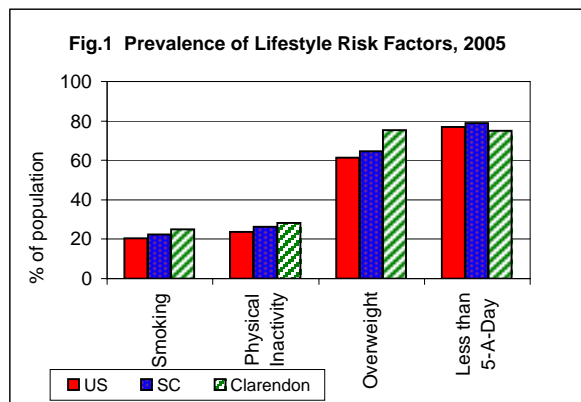

- Diabetes affects more than 23 million Americans and contributes to almost 234,000 deaths a year.
- Diabetes is becoming more common in the United States. From 1980 through 2007, the number of Americans with diabetes increased from 5.6 million to 17.9 million
- The direct and indirect costs of diabetes in the U.S. were nearly \$174 billion in 2007.
- 72,507 people died of diabetes in the U.S. in 2006.

Diabetes in South Carolina

- Approximately 332,000 adults in South Carolinians are diagnosed with diabetes. African Americans have twice the prevalence than Whites.
- The total direct costs of hospitalizations and emergency room visits were over \$8.5 billion in 2005.
- Diabetes is the seventh leading cause of death in South Carolina, claiming 1,183 lives in 2005.

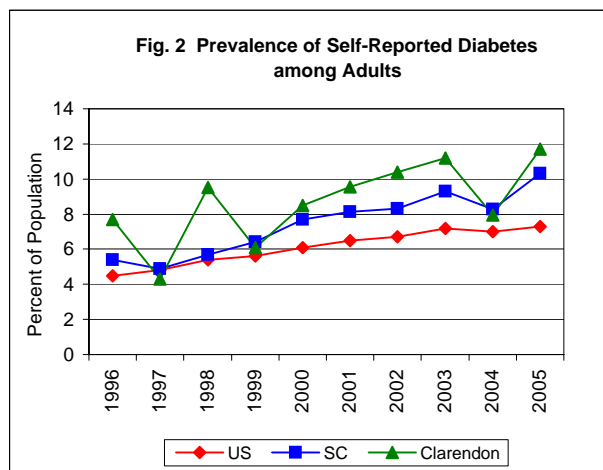

Behavioral Risk Factors

- Major behavioral risk factors, such as overweight, physical inactivity and unhealthy diet, are partially responsible for development of type 2 diabetes (Fig 1).

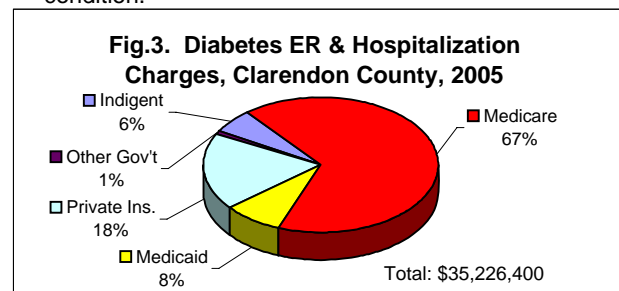

Diabetes Prevalence

- An estimated 2981 adults (11.7% of adults) in Clarendon County suffer annually from Diabetes (Fig 2).

Hospital and Emergency Room Discharges

- In 2005, there were 100 hospitalizations for Diabetes in Clarendon County for all ages.
- There were an additional 977 hospital discharges with diabetes-related conditions in Clarendon County.
- In 2005, there were 154 emergency room (ER) visits for diabetes as the primary diagnosis, among which 134 (87%) were by African-American patients.
- There were 1269 ER visits for diabetes as a related condition.

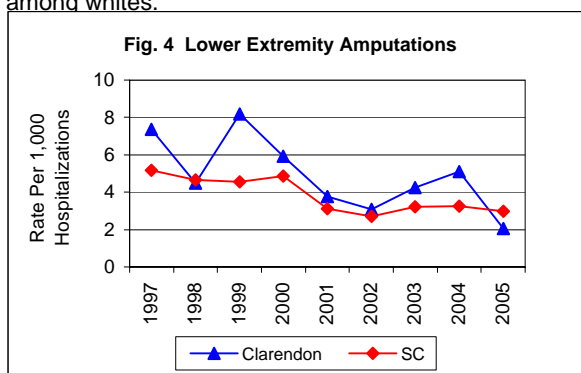

- Medicare paid for 67% of ER and Hospitalization charges in Clarendon County (Fig 3).

Complications

- Almost all patients (97%) hospitalized in SC for diabetes had complications in 2005; 27% of hospitalizations in Clarendon County (Table 1).
- In 2005, nearly three-quarters of people in SC with diabetes had hypertension, compared with only one-fourth of people without diabetes.

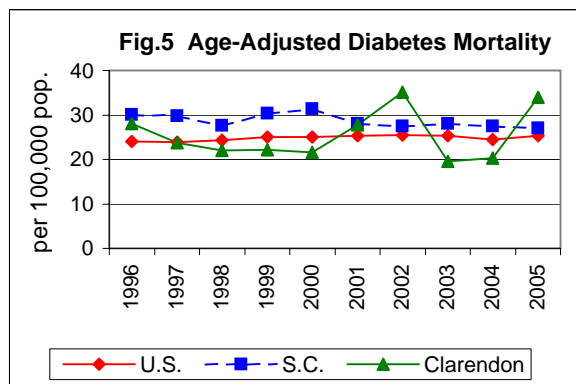

Diabetes Complication	Hospital Admissions	Percent of Diabetes Hospital Admissions	Total costs
Renal Failure	202	19%	\$4,565,000
Lower Extremity Amputation	10	1%	\$345,600
Keto-acidosis	34	3%	\$319,000
Retinopathy	41	4%	\$1,360,200

- In 2005, more than 60% of people with diabetes have high cholesterol.
- In 2005, the rates for lower extremity amputations among blacks in SC were four times the rates among whites.

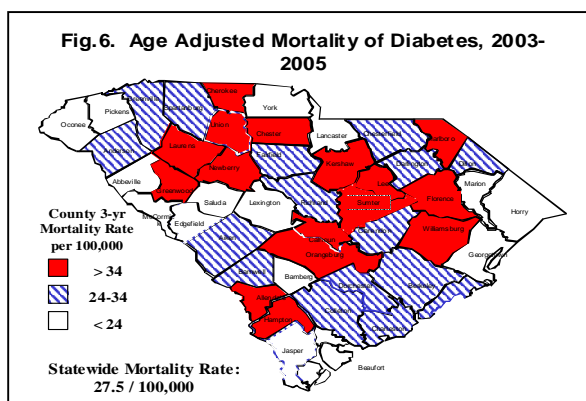

Mortality

- Diabetes is the sixth leading cause of death in Clarendon County.
- A total of 14 people in Clarendon County died from diabetes in 2005.

- The Clarendon County mortality rate was 34/100,000 in 2005, above the state average.
- Clarendon County ranks #31 in diabetes mortality in South Carolina 2003-2005.
